Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features Using Tableau
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

This brainstorming activity encourages the team to generate ideas for exploring housing market trends using Tableau. Participants should identify important housing features, pricing factors, and visualization techniques that can help analyze property sale prices. Focus on generating a wide range of ideas related to data analysis, dashboards, charts, and interactive visualizations. Team collaboration is encouraged to develop creative and effective solutions for understanding housing market patterns.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

VISUALIZING HOUSING MARKET TRENDS: AN ANALYSIS OF SALE PRICES AND FEATURES USING TABLEAU

BRAINSTORM & IDEA PRIORITIZATION

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

-  10 minutes to prepare
-  1 hour to collaborate
-  2-8 people recommended

BEFORE YOU COLLABORATE

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 MINUTES

TEAM GATHERING

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

SET THE GOAL

Think about the problem you'll be focusing on solving in the brainstorming session.

LEARN HOW TO USE THE FACILITATION TOOLS

Use the facilitation superpowers to run a happy and productive session.

 OPEN ARTICLE →

DEFINE YOUR PROBLEM STATEMENT

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 MINUTES

PROBLEM

How might we better understand and visualize housing market trends using sale prices and property features to create meaningful insights?

KEY RULES OF BRAINSTORMING

To run a smooth and productive session

-  Stay in topic.
-  Encourage wild ideas.
-  Defer judgment.
-  Listen to others.
-  Go for volume.
-  If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features Using Tableau

Brainstorm

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving.

Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Focus

Generate ideas related to analyzing housing market trends by exploring sale prices and key property features using Tableau.

- Important features to consider
- Pricing factors and market influencers
- Effective visualizations and chart types
- Interactive dashboard ideas
- Insights and stories to uncover

Guidelines

- ✓ Defer judgment
- ✓ Encourage wild ideas
- ✓ Build on others' ideas
- ✓ Stay focused on the topic
- ✓ One conversation at a time
- ✓ Be visual and concise

Ideas Wall

Capture all ideas here – big, small, simple, or complex.

Tip

Think about different data perspectives, visual encodings, and user interactions that can help reveal meaningful patterns in housing market trends.

Notes

Time Box

20 minutes

Team Members:

Step-3: Idea Prioritization

VISUALIZING HOUSING MARKET TRENDS: AN ANALYSIS OF SALE PRICES AND FEATURES USING TABLEAU

PRIORITIZE

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 MINUTES

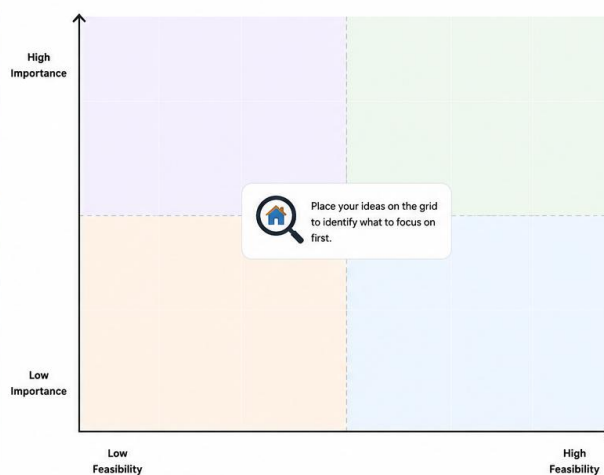

IMPORTANCE

Focus on ideas that could have the most impact on understanding housing market trends and addressing key business questions.

FEASIBILITY

Regardless of their importance, which ideas are more feasible than others? Consider data availability, time, tools, and complexity.

IDEA CATEGORIES (EXAMPLES)

- 💰 Sale Price Analysis
- 🏠 Property Features
- 📍 Location & Neighborhood
- 📅 Time-based Trends
- 👤 Buyer Preferences
- 📊 Visualization Ideas
- 🖥️ Dashboard Concepts
- 🗄️ Data Sources

TIPS

- Think about key factors that influence sale prices.
- Consider different visualizations (charts, maps, filters, dashboards).
- Explore trends over time and across locations.
- Use Tableau's strengths: interactivity, storytelling, and insights.

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features Using Tableau
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to identify the key challenges in analyzing housing market trends using Tableau. This template helps define the objectives of the project by focusing on the factors that influence property sale prices, such as location, size, number of bedrooms, bathrooms, and other housing features. It provides a structured approach to understanding the relationship between these factors and market trends.

A well-defined problem statement enables the project team to explore housing data effectively and develop interactive Tableau dashboards that present meaningful insights. By identifying patterns, comparing property characteristics, and visualizing price trends, the team can support data-driven decision-making. This process helps transform complex housing datasets into clear and actionable visualizations, making it easier to understand market behavior and evaluate the factors affecting property values.

VISUALIZING HOUSING MARKET TRENDS: AN ANALYSIS OF SALE PRICES AND FEATURES USING TABLEAU

 I am	Describe the customer with 3–4 key characteristics – who are they?	 Describe the customer and their attributes here
 I'm trying to	List their outcome or "job" the care about – what are they trying to achieve?	 List the thing they are trying to achieve here
 but	Describe what problems or barriers stand in the way – what bothers them most?	 Describe the problems or barriers that get in the way here
 because	Enter the "root cause" of why the problem or barrier exists – what needs to be solved?	 Describe the reason the problems or barriers exist
 which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	 Describe the emotions the result from experiencing the problems or barriers

PROBLEM STATEMENT FRAMEWORK

Use this framework to clearly define the key problem statements for your project.

I AM  Describe the customer with 3-4 key characteristics – who are they? Example: A real estate analyst, home buyer, or investor	I'M TRYING TO  List their outcome or "job" they care about – what are they trying to achieve? Example: Understand price trends, compare properties, make better investment decisions	BUT  Describe what problems or barriers stand in the way – what bothers them most? Example: Data is scattered, hard to analyze, lacks clear insights	BECAUSE  Enter the "root cause" of why the problem or barrier exists – what needs to be solved? Example: Lack of interactive visualization, complex data relationships	WHICH MAKES ME FEEL  Describe the emotions from the customer's point of view – how does it impact them emotionally? Example: Frustrated, confused, unsure, or missing opportunities

Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features Using Tableau
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a visual framework that helps understand the needs, goals, and challenges of users involved in housing market analysis. For the project **"Visualizing Housing Market Trends: An Analysis of Sale Prices and Features Using Tableau,"** it captures the perspectives of home buyers, real estate analysts, investors, and decision-makers by identifying what they think, observe, hear, say, and experience while analyzing housing data.

The empathy map enables the project team to better understand user expectations, difficulties in interpreting complex housing datasets, and the need for interactive visualizations. By focusing on users' goals and pain points, the team can design intuitive Tableau dashboards that present meaningful insights into sale prices.

Example:

Reference: <https://www.mural.co/templates/empathy-map-canvas>

Example: Food Ordering & Delivery Application
